

ABOUT	<p>Mathematician who excels at analytical reasoning, communicating complicated ideas, and rapidly acquiring new skills and knowledge.</p> <p>Seeking a position aimed at tackling problems with a more tangible effect on the world than pure math research. To that end, have concentrated on developing programming/analytics skills to match my aptitude for quantitative reasoning, primarily focused on data science, machine learning, and object oriented programming in Python.</p> <p>Possess 10+ years of experience collaborating with small teams on difficult and abstract problems. Accomplished at analyzing problems, constructing solutions, and effectively communicating the results to users and stakeholders with varying levels of expertise. Excellent at synthesizing and distilling complex concepts/scenarios.</p>
